### **EXAMINER'S AMENDMENT**

This application is in condition for allowance except for the presence of claims 13-16 directed to a specific composition non-elected without traverse. Accordingly, claims 13-16 have been cancelled.

Claims 2 and 4 were cancelled in the response dated October 22, 2009.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Please change claim 1 to read:

“Method to manufacture a metallized paper which comprises the stages of:

(i) curtain coating of a first aqueous film-forming composition on a substrate;

(ii) metallizing the coated substrate; and

(iii) curtain coating of a second aqueous film-forming composition on said metallized substrate, characterized in that said first and second aqueous film-forming composition comprises a first emulsion polymer and/or second colloidal dispersion polymer, wherein said first and/or second aqueous film-forming composition is selected from an acrylic polymer, an acrylic-styrene polymer, a modified acrylic polymer and their mixtures and wherein said first and/or second aqueous film-forming composition has:

Art Unit: 1792

- a) a low-shear viscosity, measured in a Brookfield viscometer at 60 rpm and 20°C, between 60 and 220 mPas;
- b) a high-shear viscosity, measured in a Haake viscometer at 37,750 s<sup>-1</sup> and 20°C, between 2.3 and 35 mPas; and
- c) a static surface tension, measured by a ring tensiometer, between 25 and 40 dyn/cm.”

Claim 5 and 6 are cancelled.

Authorization for the examiner's amendment of claim 1 and cancellation of claims 5 and 6 was given in a telephone interview with Bob Netter on February 26, 2010.

Claims 1, 3, 4 and 7-12 are allowed.

The following is an examiner's statement of reasons for allowance: The reference to Blake et al. (US 5391401) teaches the properties a and b of claim 1 with no teaching of c or an acrylic polymer. The reference to Kisugi et al. (GB 2085757) teaches the property c with no teaching of a, b or an acrylic polymer. In addition, Kisugi and Blake teach different polymers from each other. Also, the general teaching of Urscheler (US 7425246) fails to teach any of the particular properties and is drawn to a basic coating process. The showing of experimental data in applicant's specification, particularly the comparative examples 11-14 which provide examples slightly outside of the claimed ranges, is sufficient to show the importance of the claimed viscosity and tension parameters.

Art Unit: 1792

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan Schiro whose telephone number is 571-270-5345. The examiner can normally be reached on Monday-Friday, with every other Friday off, from 8 AM to 6:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Barr can be reached on 571-272-1414. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
